

DHAMODARAN NARAYANA PERUMAL

Engineering Lead - Mobility & AI Integration (Cordova / Ionic / Capacitor)

Chennai, Tamil Nadu, India | 📞 +91 96556 06681 | ✉️ dhamodaran@outlook.in | 🌐 dhamo.in

AVAILABILITY: SERVING NOTICE PERIOD (LAST WORKING DAY: JUNE 12, 2026)

PROFESSIONAL SUMMARY

Mobile Application Engineer and Tech Lead with 4+ years of experience specializing in hybrid mobile application development, mobile app security, and integrating Generative AI capabilities into mobile ecosystems. Expert in managing 6+ end-to-end enterprise client implementations, optimizing architectures, and driving complex Cordova upgradations and Capacitor migrations across iOS and Android. Possess a deep understanding of Vanilla JavaScript, HTML5, alongside robust backend integration experience with Java/J2EE and Spring Boot APIs. Proven track record in mobility solutioning, rigorous AppSec mitigation, and deploying production-ready LLMs via Amazon Bedrock and Google Cloud Vertex AI to power intelligent, context-aware mobile experiences. **Currently serving notice period with a last working day of June 12, 2026.**

SKILLS & TECHNOLOGIES

- **Generative AI & LLMs:** Purple Fabric, Claude AI, Amazon Bedrock, Google Cloud Vertex AI, RAG (Retrieval Augmented Generation), Model Context Protocol (MCP) Mobile Client Integration, Prompt Engineering, Tool Use / Function Calling (JSON Schema), Prompt Caching, Claude Code.
- **Hybrid Mobile:** Cordova, Capacitor, PhoneGap, Ionic, Custom Plugin Creation & Migration.
- **Security & App Hardening:** DexGuard, AppProtectt, Talsec, RASP Development, JavaScript Obfuscation, R8 Minification, SDK Integration, Google Play Integrity, Signature Verification, VAPT.
- **Native Development:** Android NDK & JNI (C/C++ Native Development), Java/Kotlin, Objective-C/Swift.
- **Engineering Leadership:** Mobility Solutioning, System Design, Impact Analysis, Team Management, Code Reviews, CCB Reviews.
- **Core Front-End:** Vanilla JavaScript (ES6+), HTML5, CSS3, Responsive/Adaptive Web Design, React, Angular.
- **Backend & Integrations:** Java/J2EE, Spring Boot (Stateful & Stateless APIs), Cloud Integration (AWS), Push Notifications (FCM/APNS).
- **Build Tools & Testing:** VS Code, Cursor, Android SDK, Xcode, Chrome Developer Tools, Cross-browser UI debugging, Git, SVN, Jenkins CI/CD, SonarQube.
- **Deployment & Distribution:** App Store Connect (TestFlight), Google Play Console

(Internal App Sharing, Alpha/Beta/Prod), Managed Publishing, App Signing, App Versioning.

PROFESSIONAL EXPERIENCE

Intellect Design Arena Ltd | Chennai, India

Consultant (Product Lead) | Feb 2024 – Present

- **Mobility Solutioning & Architecture:** Spearheaded brainstorming, system design, and impact analysis for flagship mobile financial applications. Architected comprehensive Cordova upgradation strategies and managed seamless plugin migrations from Cordova to Capacitor to modernize the mobile stack.
- **AI Integration & Smart Features:** Spearheaded the integration of AI models via Purple Fabric, Amazon Bedrock and Google Cloud Vertex AI directly into mobile financial apps to power intelligent conversational interfaces and multi-turn financial assistants.
- **Model Context Protocol (MCP):** Implemented MCP clients within the hybrid mobile architecture, enabling secure, real-time tool use (function calling) and context retrieval (RAG) between the mobile frontend and enterprise backend data sources.
- **Native Security & App Hardening:** Drove rigorous AppSec mitigation utilizing industry-leading SDK integrations (AppProtectt, Talsec). Enforced deep application hardening via DexGuard, R8-based minification, and advanced JavaScript obfuscation. Engineered robust native security utilizing Android NDK and JNI for C/C++ native development.
- **Team Management & Delivery:** Led agile teams through the full SDLC utilizing Jira and ServiceNow. Facilitated Change Control Board (CCB) reviews and mentored engineers to uphold enterprise coding standards.
- **Deployment Lifecycle & AI Automation:** Managed 6+ concurrent enterprise client implementations, orchestrating the complete deployment cycle. Expertly navigated Apple Store and Google Play app review submissions while accelerating cross-platform debugging and UI resolutions utilizing autonomous agents and Claude Code.

Associate Consultant (Product Engineer - Mobility) | Jun 2022 – Jul 2023

- **Vanilla JS & Tooling:** Leveraged a deep understanding of JavaScript to optimize rendering times and resolve complex state management issues on low-memory mobile devices.
- **Cross-Browser & UI:** Engineered highly responsive and adaptive web designs for desktop, tablet, and mobile platforms utilizing HTML5, CSS3.
- **Task Automation:** Streamlined the mobile build process by integrating task automators (Gulp/Grunt) into the CI/CD pipeline, significantly reducing manual build times for both testing and production environments.

Otomate Technologies | Chennai, India

Full Stack Developer | Aug 2021 – Mar 2022

- Built dynamic, client-facing front-end interfaces using Angular, seamlessly connecting them to backend Spring Boot REST APIs.

- Established system monitoring tools and managed cloud infrastructure (AWS) to ensure high-availability services for hybrid mobile clients.
- Dockerized backend web services and maintained source control workflows utilizing Git and Jenkins.

KEY PROJECTS

- **Corporate Banking Mobile App (CMS):** An enterprise-grade corporate banking application engineered utilizing Cordova, Capacitor, Ionic, and Angular. Upgraded the application with a highly responsive conversational AI interface utilizing AI Models using Purple Fabric Platform and External APIs and optimized prompt caching to minimize mobile latency. Orchestrated plugin migrations to Capacitor, integrated cross-platform push notifications, and successfully managed the end-to-end release pipeline for 6+ distinct client deployments.
- **Aran RASP (Mobile AppSec):** A cybersecurity SDK implementing Mobile RASP (Runtime Application Self-Protection) and advanced AppSec mitigation. Handled deep vulnerability detection and app hardening (DexGuard, JavaScript Obfuscation). Developed low-level security checks using Android NDK and JNI (C/C++) to fortify the hybrid mobile environment against reverse engineering, malware, and network spoofing.

AWARDS & ACHIEVEMENTS

- **SPOTLIGHT (GEM) Award** | *Intellect Design Arena Ltd (Apr 2025)* - Recognized for outstanding leadership and problem-solving, taking the initiative to clear critical Cordova/Capacitor build failures and unblock the on-time production launch of iOS and Android apps.
- **SPOT Award** | *Intellect Design Arena Ltd (Nov 2024)* - Received direct client appreciation for exceptional technical debugging, AppSec vulnerability mitigation, and cross-platform UI resolution.

CERTIFICATIONS & AI TRAINING

- **AI Integration:** Claude with Amazon Bedrock (Anthropic Academy) | Claude with Google Cloud's Vertex AI (Anthropic Academy).

EDUCATION & INTERNSHIP

- **Bachelor of Engineering (Computer Science)** | *Stella Mary's College of Engineering* | 2018-2021 (First Class)
- **Diploma in Computer Science** | *Surya Polytechnic College, Kanyakumari* | 2011-2014 (First Class)
- **Web Development Intern** | *CKS Solutions* | Dec 2018 – May 2019
