

DHAMODARAN NARAYANA PERUMAL

Principal Mobile Engineering Lead (Native, Cross-Platform & Hybrid) 📍 Chennai

☎ +91 96556 06681 | ✉ dhamodaran@outlook.in | 🔗 dhamo.in

AVAILABILITY: SERVING NOTICE PERIOD (LAST WORKING DAY: JULY 16, 2026)

PROFESSIONAL SUMMARY

Visionary Mobile Application Tech Lead with 4+ years of extensive experience defining architecture and scaling enterprise mobile applications across the entire development spectrum. Highly capable of managing diverse engineering squads executing **Native-First** (SwiftUI, Jetpack Compose), **Cross-Platform** (React Native, Flutter, Kotlin Multiplatform), and **Hybrid** (Capacitor, Cordova) developments. Proven track record in mobility solutioning, complex API/hardware integrations, and rigorous AppSec mitigation. Expert in deploying production-ready Generative AI (Amazon Bedrock, Google Cloud Vertex AI) to power context-aware mobile experiences, and automating end-to-end delivery pipelines via Fastlane and robust CI/CD. Currently serving notice period with a last working day of June 12, 2026.

SKILLS & TECHNOLOGIES

- **Native-First Development:** Swift, SwiftUI, Kotlin, Jetpack Compose, Objective-C, Android NDK & JNI (C/C++).
- **Cross-Platform & Hybrid:** React Native, Flutter, Kotlin Multiplatform (KMP), Cordova, Capacitor, Ionic, Custom Plugin Architecture.
- **App Architecture & State:** MVVM, Clean Architecture, Micro-frontends, Redux (React), BLoC/Riverpod (Flutter).
- **Security & App Hardening:** DexGuard, AppProtectt, Talsec, RASP Development, JavaScript Obfuscation, SDK Integration, Google Play Integrity, Signature Verification.
- **Generative AI & LLMs:** Purple Fabric, Claude AI, Amazon Bedrock, Google Cloud Vertex AI, RAG, Model Context Protocol (MCP) Mobile Client Integration, Prompt Caching.
- **Backend & Hardware Integrations:** BLE, NFC, Firebase Ecosystem (Firestore, Cloud Functions, Crashlytics), Java/Spring Boot APIs, GraphQL.
- **DevOps, CI/CD & Distribution:** Fastlane, Bitrise, GitHub Actions, Jenkins, App Store Connect (TestFlight), Google Play Console, Managed Publishing.
- **Engineering Leadership:** Mobility Solutioning, System Design, Cross-functional Squad Leadership, Code Reviews, Effort Estimation, CCB Reviews.

PROFESSIONAL EXPERIENCE

Intellect Design Arena Ltd | Chennai, India

Consultant (Principal Mobile Tech Lead) | Feb 2024 – Present

- **Omni-Channel Mobile Architecture:** Spearheaded system design and technical roadmaps for flagship financial applications. Architected comprehensive modernization pathways, guiding engineering squads in migrating legacy hybrid applications into high-performance **React Native** and **Kotlin Multiplatform (KMP)** architectures.
- **Native & UI Innovation:** Engineered complex native bridging modules utilizing **SwiftUI** (iOS) and **Jetpack Compose** (Android) to deliver buttery-smooth, native-first user experiences within cross-platform containers.
- **AI Integration & Smart Features:** Led the integration of AI models via Purple Fabric, Amazon Bedrock, and Google Cloud Vertex AI directly into mobile apps, powering intelligent multi-turn financial assistants. Implemented MCP clients for secure, real-time tool use and context retrieval (RAG).
- **Native Security & App Hardening:** Drove rigorous AppSec mitigation utilizing industry-leading SDKs (AppProtectt, Talsec). Enforced deep application hardening via DexGuard and advanced obfuscation. Authored robust native security guardrails utilizing Android NDK and JNI.
- **DevOps & Automated Delivery:** Architected and automated zero-touch mobile deployment pipelines utilizing **Fastlane** and Bitrise for 6+ concurrent enterprise clients. Managed strict semantic app versioning, app signing, and automated TestFlight/Play Console publishing.
- **Team Leadership & Quality Assurance:** Mentored cross-functional teams of native and hybrid engineers. Facilitated Change Control Board (CCB) reviews, enforced Clean Architecture/MVVM paradigms, and conducted rigorous code reviews focusing on memory management and thread safety.

Associate Consultant (Product Engineer - Mobility) | Jun 2022 – Jul 2023

- **Hybrid & JS Optimization:** Leveraged a deep understanding of Vanilla JavaScript (ES6+), React, and Angular to optimize rendering times and resolve complex state management issues on low-memory mobile devices.
- **Cross-Browser & UI:** Engineered highly responsive and adaptive web designs for desktop, tablet, and mobile platforms utilizing HTML5 and CSS3.
- **Task Automation:** Streamlined mobile build processes by integrating task automators (Gulp/Grunt) into the CI/CD pipeline, reducing manual build times for both testing and production.

Otomate Technologies | Chennai, India

Full Stack Developer | Aug 2021 – Mar 2022

- Built dynamic, client-facing front-end interfaces using Angular, seamlessly connecting them to backend Spring Boot REST APIs.
- Established system monitoring tools and managed cloud infrastructure (AWS) to ensure high-availability services for hybrid mobile clients.
- Dockerized backend web services and maintained source control workflows utilizing Git and Jenkins.

KEY PROJECTS

- **Corporate Banking Mobile Platform (CMS):** An enterprise-grade banking suite. Evolved the architecture from legacy Cordova to a modern cross-platform stack utilizing Capacitor and React Native. Built custom native plugins using Swift and Kotlin to handle low-level device communication. Integrated a highly responsive conversational AI interface via Purple Fabric, and managed the end-to-end automated release pipeline (via Fastlane) for 6+ distinct client deployments.
- **Aran RASP (Mobile AppSec):** A cybersecurity SDK implementing Mobile RASP. Handled deep vulnerability detection and app hardening. Developed low-level security checks using Android NDK and JNI (C/C++) to fortify hybrid and native environments against reverse engineering, malware, and network spoofing.

AWARDS & ACHIEVEMENTS

- **SPOTLIGHT (GEM) Award** | *Intellect Design Arena Ltd (Apr 2025)* - Recognized for outstanding technical problem-solving, taking the initiative to clear critical build failures and unblock the on-time production launch of iOS and Android apps.
- **SPOT Award** | *Intellect Design Arena Ltd (Nov 2024)* - Received direct client appreciation for exceptional technical debugging, AppSec vulnerability mitigation, and cross-platform UI resolution.

CERTIFICATIONS & AI TRAINING

- **AI Integration:** Claude with Amazon Bedrock (Anthropic Academy) | Claude with Google Cloud's Vertex AI (Anthropic Academy).

EDUCATION & INTERNSHIP

- **Bachelor of Engineering (Computer Science)** | Stella Mary's College of Engineering | 2018 – 2021 (First Class)
- **Diploma in Computer Science** | Surya Polytechnic College, Kanyakumari | 2011 – 2014 (First Class)
- **Web Development Intern** | CKS Solutions | Dec 2018 – May 2019
